SINCE 1962

## NATURE-LOVING ECO-FRIENDLY SUSTAINABLE

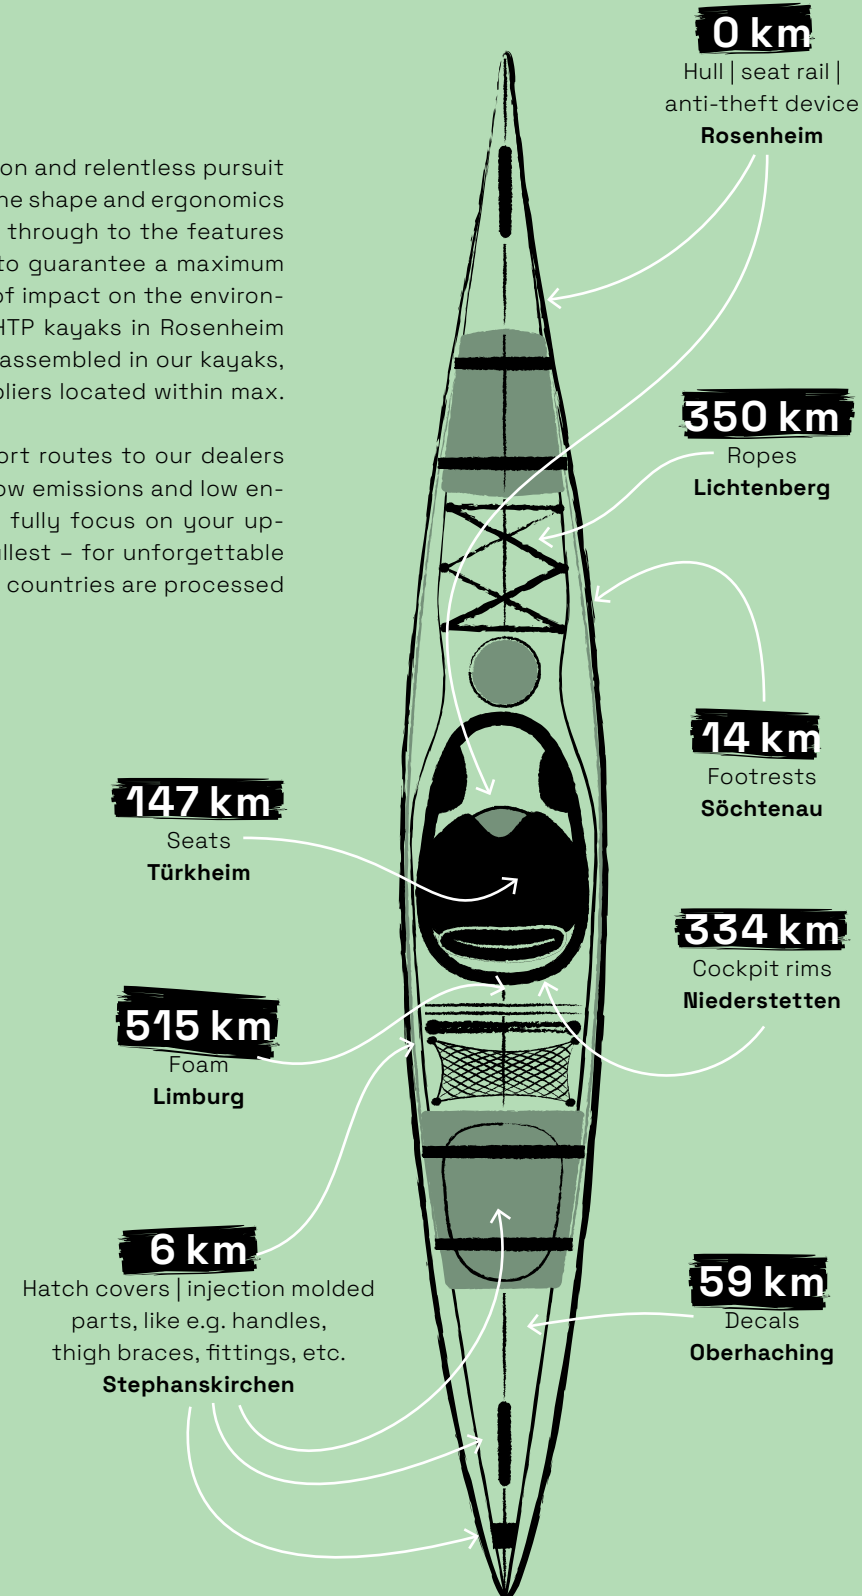

Prijon stands for thoroughgoing innovation and relentless pursuit of perfection in everything we do. From the shape and ergonomics of your kayak and your seating-system, through to the features and materials: we consider all aspects, to guarantee a maximum of performance for you and a minimum of impact on the environment. That's why we manufacture our HTP kayaks in Rosenheim and more than 80 % of the components assembled in our kayaks, come from our own factory or from suppliers located within max. 300 km radius.

This ensures short delivery- and transport routes to our dealers and customers. And this results in only low emissions and low energy costs for the delivery. So you can fully focus on your upcoming adventure and enjoy it to the fullest – for unforgettable memories. Materials from neighboring EU countries are processed further in Rosenheim.

OUR LOVE FOR NATURE AND THE RESPONSIBILITY FOR THE FOLLOWING GENERATIONS IS A MATTER CLOSE TO OUR HEART.

We award the eco-label to all of our products, produced according to these standards. Because from the idea to the ready for delivery product, the production and quality checks are at our hands and the value chain stays in the country.

All PRIJON boats  
are diligently  
assembled by hand.

All Prijon sewn and  
pressed parts are manu-  
factured by our employees  
in our in-house sewing  
shop and on the press.

### INHOUSE ENERGY GENERATION:

We operate a photovoltaic-system on the roof of our warehouse and ecologically produce a part of our needed electricity for the production out of sunlight. Since its activation, we saved approx. 450 to of CO<sub>2</sub>.

# KAYAK-FINDER

## WHICH KAYAK IS THE RIGHT ONE FOR ME?

We offer touring- and seakayaks, recreational and whitewater kayaks. Our kayak-models are subdivided in four categories, to make the selection easier for you. They are classified according to the shape of the kayak and its purpose. On our website [www.prijon.com](http://www.prijon.com) you will find a more exact and detailed comparison tool. On the pages 64-65 you'll find all data and specifications as well as a classification of the kayaks according to their area of application in an overview.

### SPECIFICATIONS

Weight of kayak

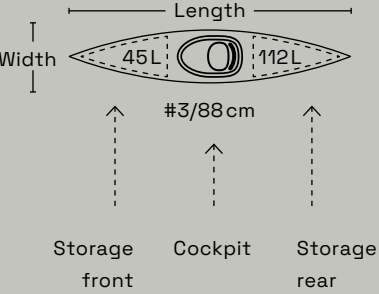

Volume of kayak

Paddler's weight

Capacity  
(paddler + gear)

### CHARACTERISTICS

Paddling characteristics with raised Skeg

Paddling characteristics with lowered skeg

Directional stability

Maneuverability

Stability

Resurfacing

Velocity

### FAST SINGLE-SEATERS FOR LAKES, THE COAST AND THE SEA

These kayaks are slim and long, which makes them fast and track well. Perfect for sporty and ambitious paddlers, for fast trips with or without luggage. You'll find the fast single-seaters from page 22.

### ALLROUNDERS FOR RIVERS, LAKES AND CALM COASTAL AREAS

Kayaks for a wide purpose. Established allrounders for tours with luggage, agile kayaks for moving rivers and various double-seaters. These kayaks offer you a high stability and a good ground Velocity. You'll find our allrounders from page 32.

### ENTRY-LEVEL KAYAKS FOR BEGINNERS AND CASUAL PADDLERS

Made for short trips with small luggage and the rental business. Very stable and neutral to paddle, these boats are very easy to get along with. They track well, are easy to maneuver and are offered at an attractive entry-level price. You'll find the entry-level kayaks from page 42.

### WHITewater KAYAKS FOR EXTREME TRIPS IN RIVERS

Short and very agile kayaks with a heavy rocker, for easy to heavy whitewater. Equipped with a special whitewater seat-system and nearly indestructible hull made of HTP. You'll find whitewater kayaks from page 9.

# CHALLENGE NATURE

WHITEWATER - KAYAKS

Whether you're paddling on wild rapids or drifting downstream bend after bend. Whether you're surfing a wave or recharging your batteries in an eddy. You need a kayak that meets the demands of your adventure. You can rely on your Prijon HTP boat, no matter what the conditions throw at you. Take on nature and discover your wild side.

**BRAND  
NEW**

**BRAND NEW!**

**PR-X WHITEWATER SEATING-SYSTEM**

**A WHOLE NEW LEVEL IN  
COMFORT AND LOW WEIGHT!**

Our new whitewater seat system consists of a bottom rail, a superlight and ergonomically shaped foam seat and optimized 3-D thigh braces. The super-light and precisely shaped foam seat gives you stable support and a comfortable seat. It's attached to the bottom of the boat using market-leading technology and you can easily reposition it in a few simple steps. The form-fit both with the lateral foam wedges and the bottom rail guarantees

a secure hold of the seat in the boat. This injection-molded floor rail with fiberglass reinforcement, together with the foam domes in front and rear, additionally reinforce the robust HTP hull. A maximum of contact and comfort is offered by the optimized 3-D thigh braces. These are now even lighter, offer more space in the boat, as the leg position is less stretched, and give you a great paddling experience without compromise.

**Discover the PR-X seating system in our whitewater kayaks  
BEAST, PIKE, PARTY PIKE and COCAINE.**

**BRAND  
NEW**

**BEAST**

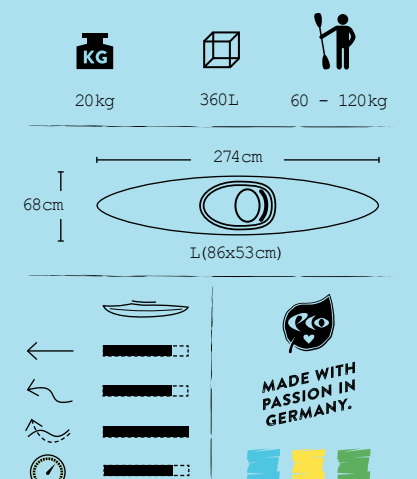

**BEAST PR-X**

#101640

A high-volume and new-generation Creeker with a lot of rocker in the bow and a stern with an optimized current stall. The design of this kayak enables you to realize advanced maneuvers, where you push the flat stern under water to raise the bow with its heavy rocker over waves and rollers. We combined an optimized distribution of volume around the cockpit with a modern bottom to set the benchmark regarding safety, stability and re-surfacing as well as gliding behavior.

A length of 9 foot and a very dry running bottom ensure a high speed, to safely arrow over retentive holes or to speed up in waves. Medium paddlers till approx. 80 kg can use it as full-featured creeker, while large paddler are able to paddle the BEAST like a high volume riverrunner. The new PR-X foam seat system combined with our indestructible HTP-hull results in an unbeatable light overall concept.

**BRAND  
NEW  
PR-X SEAT**

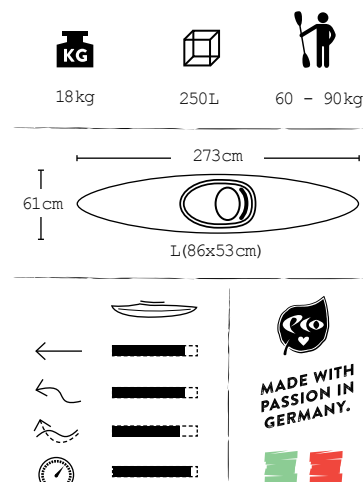

**PIKE**

**PIKE PR-X**  
#101664

Born out of the idea to shape the perfect riverplay-kayak. A sporty river runner with an enormous fun factor. This kayak combines playing, cruising and creeking in one boat. Thanks to its fast and agile shape, this boat combines the paddling dynamics of a river-runner with the safety of a creeker. It has enough rocker and volume to climb up over big holes, a sporty stern for a lot of fun, and a planning hull for when you find an inviting river wave. When things get rough, the new PIKE PR-X always stays on top and dry thanks to its voluminous and strongly curved bow.

**BRAND  
NEW  
PR-X SEAT**

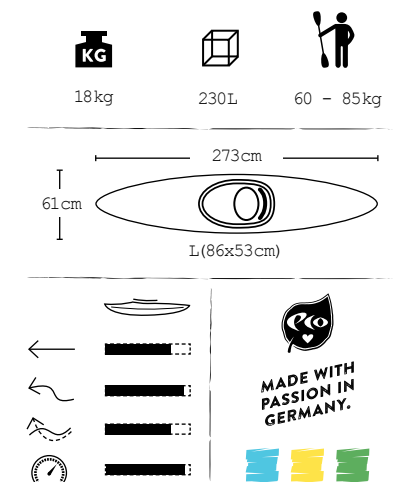

**PARTY  
PIKE**

**PARTY PIKE PR-X**  
#101665

The ultimate play- and racemachine! The Party Pike is our super-fast and enormously agile riverplay kayak with a super flat, playful stern! It's extremely easy to undercut and to turn it on the spot. On the river, it spins playfully through eddies, waves and rollers and knows how to use the river in style. Thanks to this agility and playfulness, the Party Pike rides very smooth in whitewater and can be paddled by persons up to 85 kg. Compared to the Pike, the stern of the Party Pike sits deeper in the water, has considerably less volume and a slimmer shape in side view. This makes stern squirting much easier, especially for lighter paddlers. And transforms this already snappy riverrunner in a perfect playmate and raceboat. Your ticket for the party!

BRAND  
NEW  
PR-X SEAT

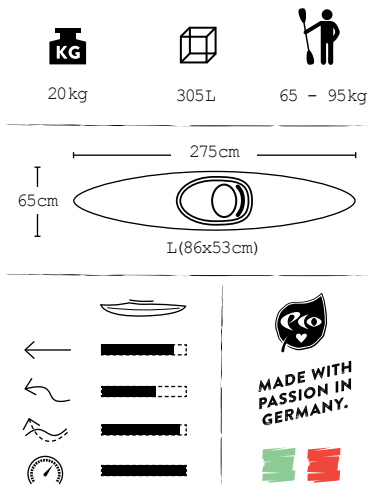

**COCAINE**

**COCAINE PR-X**  
#101651

You want to paddle fast in whitewater? You want to sit in an 275cm agile kayak? Then the Cocaine is the right one for you! It will make you paddle ridiculously fast and after one paddle you will be addicted to paddling it. Its length of 275 cm and its long waterline make it fast, the flat bottom offers excellent agility when needed. Shaped for paddlers looking for a fast whitewater kayak and for participants in boater-cross races.

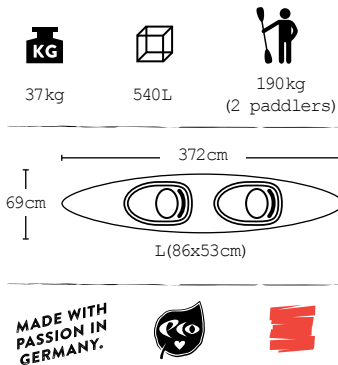

**2B**

**2B**  
#102010

It doesn't matter if you want to explore whitewater with your best friend, family or an inexperienced paddler – with this whitewater tandem paddling is double the fun! In heavy whitewater two experienced kayakers can show their skills, while kayak schools and rental stations are another ideal terrain for the 2B. The flat bottom, combined with the firm edges and the heavy rocker, guarantee its stability in whitewater. It's very easy to maneuver.

The 2B offers you unprecedented paddling enjoyment! A light double-seater with the paddling characteristics of a modern whitewater kayak. Our individually adjustable PRO-outfitting offers you padded seats and thigh braces, aluminum bulkhead footrests in front and rear guarantee maximum comfort and safety. A new way to paddle whitewater in twos!

**2B - 2B KIDS-SEAT SET**  
#10000047

Paddling like the adults! The separately available child seat consists of a foam cushion for the seat and the footplate. It enables your child to sit in a raised position and offers maximum comfort due to the reduced size of the seat and the shortened distance to the footplate. With this help, your child can see, paddle, and also be above the waves that come over the deck. The seat cushion is racked on the PRO-seat, the cushion of the footplate is racked on the footrest.

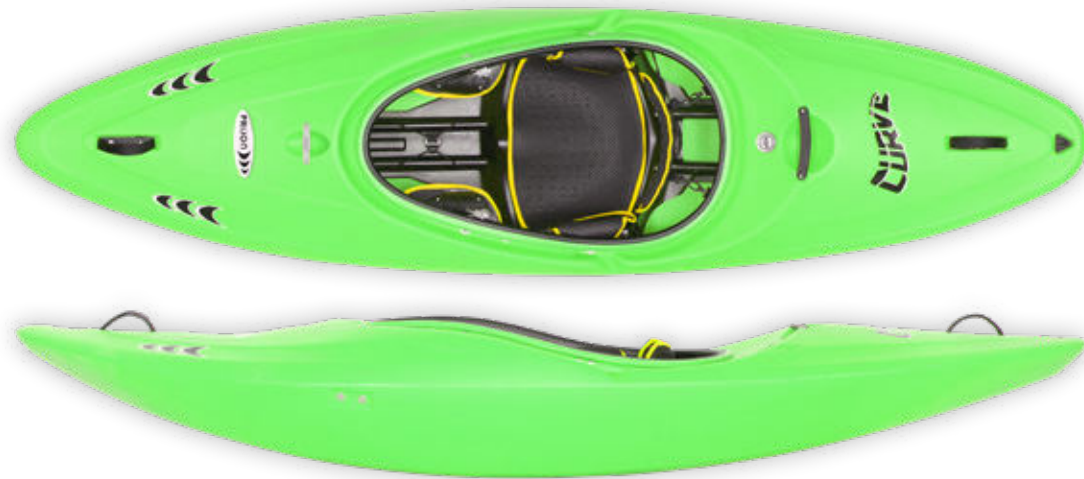

BOTH CURVE SIZES ARE STILL AVAILABLE  
AS PRO- AND SPORT VERSION.

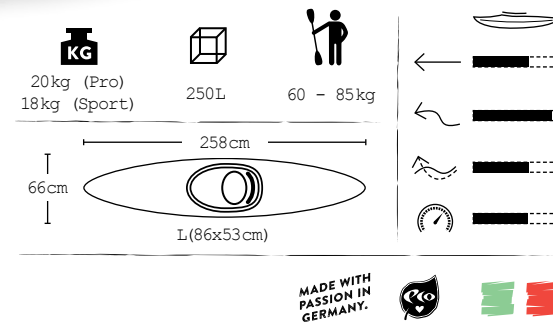

Further information on [www.prijon.com](http://www.prijon.com)

### CURVE 2.5 HTP

PRO: #101620  
SPORT: #101623

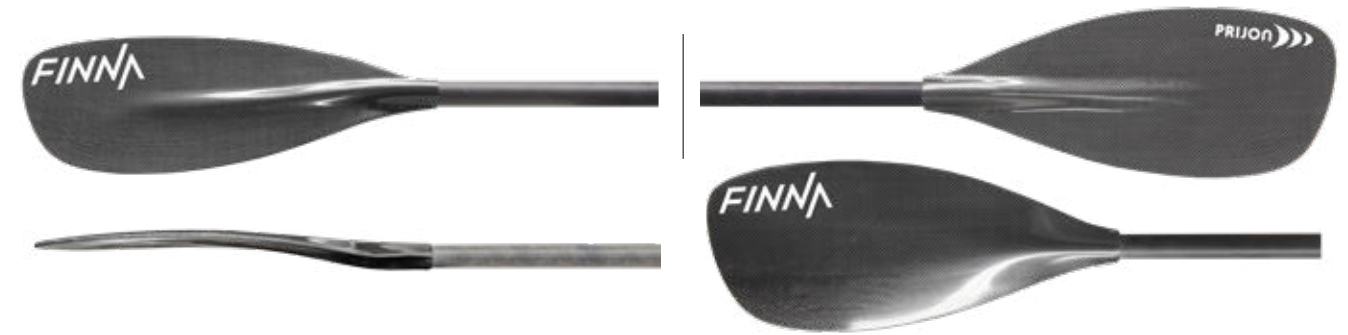

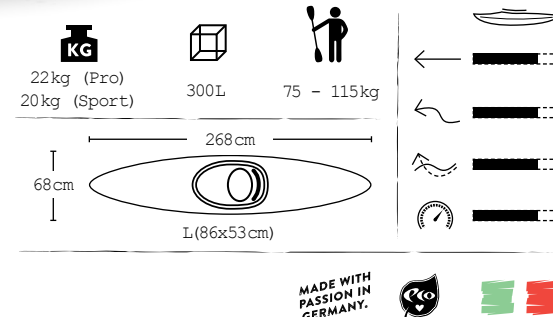

Nippy and very agile river runner for smaller and lighter paddlers. Its low weight and the smaller measurements simplify its handling. The backwards extended cockpit extends the room to move. Safety is offered by the wide tip, the high rocker profile makes surfing waves easy.

### CURVE 3.0 HTP

PRO: #101600  
SPORT: #101603

The allrounder! Doesn't matter if you want to paddle easy or heavy whitewater, small or steep creeks - this kayak is agile, runs fast and precisely in an out of eddies and its flattened stern invites you to stern squirt at every occasion. Catch the next wave and surf it with the Curve 3.0!

# INTO THE UNKNOWN!

## SEAKAYAKS

The world is yours. Take it up with all waters and discover our perfect companions for your memorable journeys, exciting adventures and everything else you have in mind. Your Prijon seakayak is brimful with functions which help you to master your next challenge. Go for it!

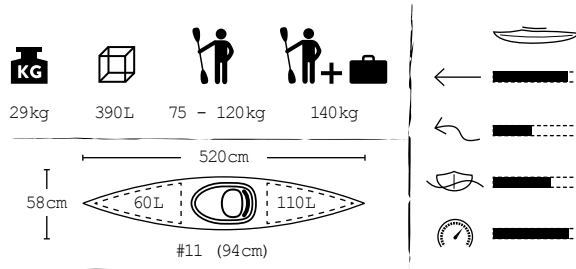

# SEATRON GT

## SEATRON GT

#100490

A kayak for taller paddlers looking for a durable quality performance seakayak for short and long tours, that can handle rough conditions and runs effortlessly on calmer days. Made primarily for extensive open water crossings, surfing waves and long multiday trips with everything you need. The SEATRON GT has a high stability combined with a high maneuverability, especially during rough conditions at sea. Its modern shaped, progressive hull with a medium rocker profile enables you to either paddle fast and straight or move the kayak on the edge by using your weight and paddle technique. It surfs well with following waves as you paddle and is effortless to control. SEATRON GT keeps its excellent characteristics also when fully loaded. Tall paddlers will love the spacious foot space / leg room and the comfort from all the finer details made in this kayak. Volume is increased in the front of the kayak for better lift over waves giving a dryer ride into the wind. Hatches are the larger type with neoprene with plastic protective covers fixed in place with easy to use elastic lines. The day hatch forward of the cockpit is in easy reach. For this kayak there's an optional 4<sup>th</sup> day hatch behind the cockpit available at a premium.

MADE WITH PASSION IN GERMANY.

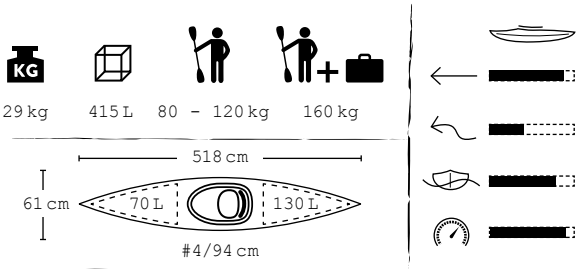

# GRIZZLY

## GRIZZLY HTP

#100410

Fast, safe and a great load carrier. Made for long trips with a lot of luggage. It's tracking well and agile on the edges. The GRIZZLY offers a lot of volume, a huge storage space and a very spacious cockpit, which is comfortable especially for taller paddlers. The high volume is also a further safety aspect when touring at sea. A spacious kayak for long trips or big paddlers!

MADE WITH PASSION IN GERMANY.

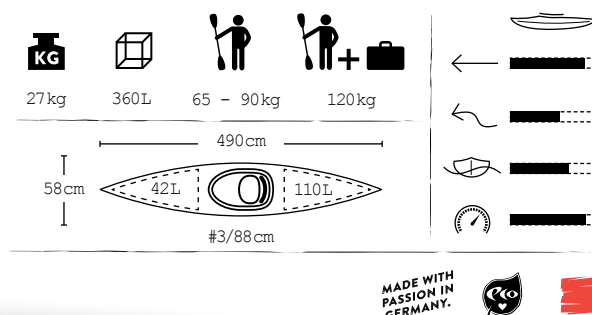

# SEAYAK

Fast and safe kayaks, easy to handle on the water. Made for multiday trips with luggage, on large rivers and open waters. They offer a very high directional stability, are easy to paddle around corners by using your weight and they're reliably stable in inclinational positions.

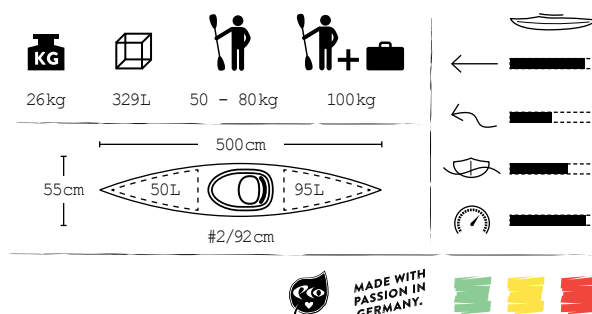

## SEAYAK CLASSIC HTP #100430

Agile allrounder for medium weight and sized paddlers. It offers comfortable space conditions and enough storage for extensive trips on rivers and open waters. A high Velocity is guaranteed by its longish and slim shape. The classic knickspant-construction makes it tracking well and easy to maneuver on the edges.

## SEAYAK 500LV HTP #100440

Sporty, fast and directional stable kayak. Its low overall volume as well as a low cockpit offer an optimum seating position for smaller and lighter paddlers. Easy to paddle by using your weight.

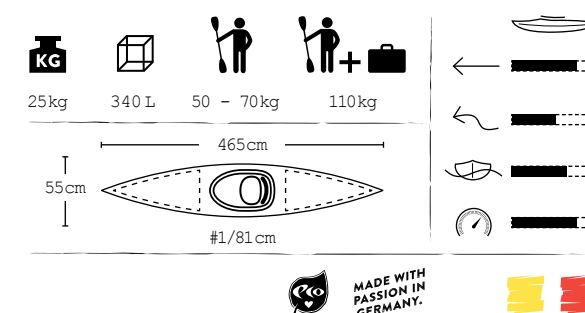

## Lavie

## LAVIE HTP #100720

Set out for new and exciting destinations with this slim sea- and touring kayak for smaller and lighter paddlers. Your perfect companion for relaxed touring, easy seakayaking journeys and overnight trips! The Lavie is easy to maneuver by using your weight, while the cleverly shaped rocker profile in combination with its speed-optimized bottom makes it amazingly fast and quite movable at the same time. And its modern and functional design combined with compact measurements reduce its overall weight to very low 25kg. The low deck minimizes influence by wind, and a very low rear deck guarantees a maximum mobility of the paddler.

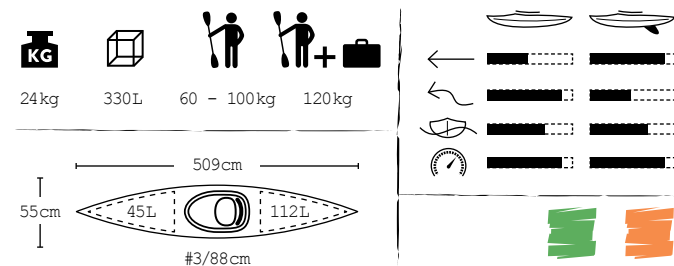

## ARUNA PRILITE

#20190

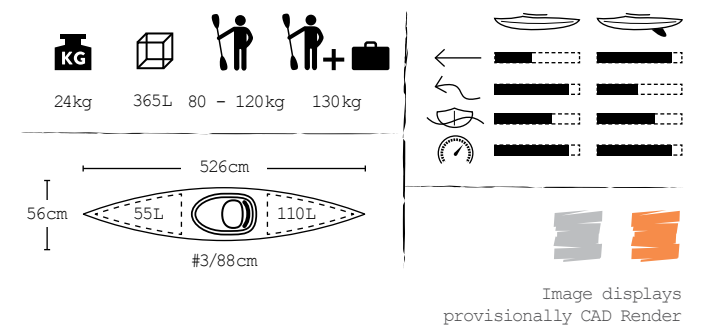

Lightweight, fast and agile skeg type sea kayak that will suit the small to medium large paddler looking for a technical kayak to use on longer tours. Easy to manoeuver using your weight and paddle strokes and incredible fun to paddle and surf. Designed for open water expeditions but equally suited to day trips on lakes and large rivers.

## NEPTUN PRILITE

#20120

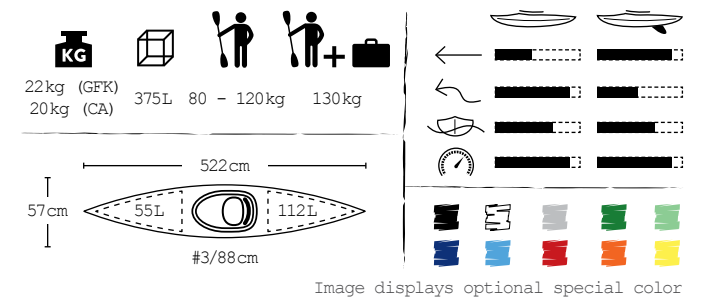

Our most agile and at the same time fast seakayak with skeg – now also available with a robust and lightweight hull made of PriLite! For unlimited fun during paddling, wave surfing and multiday trips. New for this kayak is the preparation for the mounting of a Silva 70p compass, as well as a 2nd day hatch behind the cockpit.

## NEPTUN LAMINAT

GFK: #20212  
CARBON-ARAMID: #20214

Agile and fast! The heavy rocker makes it very agile, especially when put on the edge. The slim shape makes it track well and ride fast. It tracks well with the help of the Skeg, but is very maneuverable when drawn up making it incredible fun to paddle.

BRAND NEW

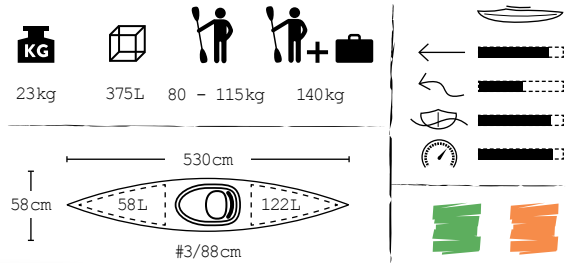

MARLIN PRILITE

#20140

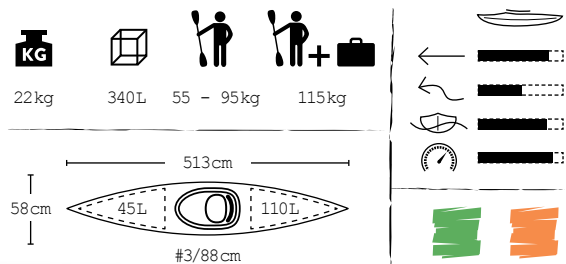

Medium to high weight paddlers choose the Marlin. An increased leg room and a higher volume in the bow guarantee a comfortable sitting positon, also on longer trips.

MARLIN PRILITE LV

#20150

Small to midsize and low to medium weight paddlers will love the Marlin LV. Thanks to its lower overall volume and the lower cockpit it offers an optimum sitting position. Very low overall weight due to the PriLite hull.

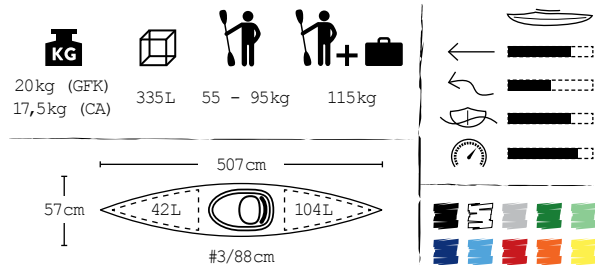

MARLIN LV LAMINAT

GFK: #20512

CARBON-ARAMID: #20513

Even lighter, hand-laminated version of the Marlin LV. A very light and stiff kayak with safe and exact handling, for tours with luggage on rivers, lakes and the coast.

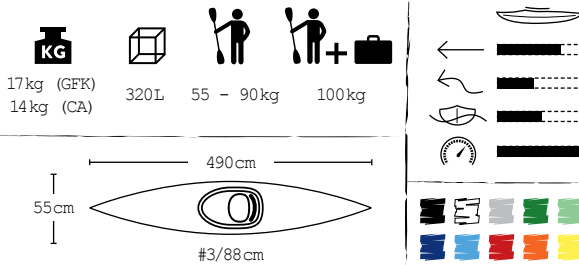

# LAMINATED SINGLE-SEATERS

## - FAST & LIGHT

### FALCON

GFK: #20472  
CARBON-ARAMID: #20474

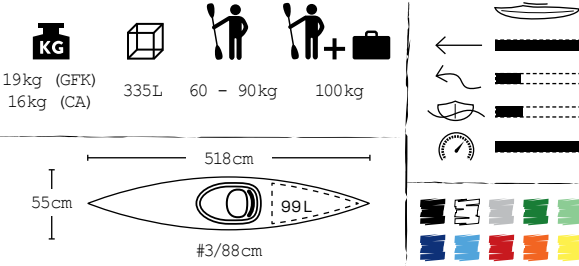

A fast fitness kayak for sporty and ambitious paddlers. Made for a morning workout on the lake, an after work lap or a fast session in between. Agile on the edge!

### BARRACUDA RS

GFK: #20802  
CARBON-ARAMID: #20804

A very fast kayak for sporty and ambitious paddlers. Made for racing marathons and long-distance competitions, training in the evening and longer tours with a small amount of luggage.

## MATERIAL AND COLOR CHOICE

Laminated kayaks are available in two material variants and in standard or customized colors at a premium. Further options are also possible. More info on our website. Please scan the QR-code.

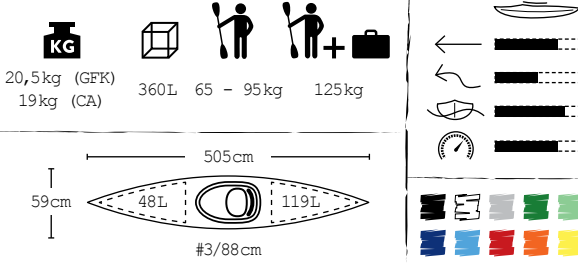

### Options:

Color of deck, bottom, seamline, etc. / Deck reinforcement, e.g. for re-entries / Full-carbon top or bottom

### MILLENIUM EVO

GFK: #20672  
CARBON-ARAMID: #20674

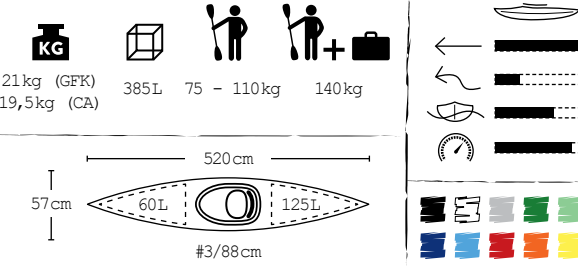

This beautiful kayak is a combination of a fast seakayak and an agile touringkayak. The long, slim, shape provides a high level of Velocity; the pronounced knickspant on the bottom offers a comparably high measure of agility.

### PROTEUS

GFK: #20292  
CARBON-ARAMID: #20294

Made for long and fast trips on open waters and along the coast. Pronounced keel-sections in the front and rear result in a long water line and consequently in a high cruising Velocity and at the same time superior handling.

# READY FOR EVERYTHING

...

## TOURING-KAYAKS

Multifunctional. Versatile. Up for everything the world has ready for you. When it's about adventure trips, your Prijon touring kayak offers you the robust functionality and all liberties, to make the best of your journey. Doesn't matter how wild your trip gets, our kayaks cope with all exertions. What are you waiting for?

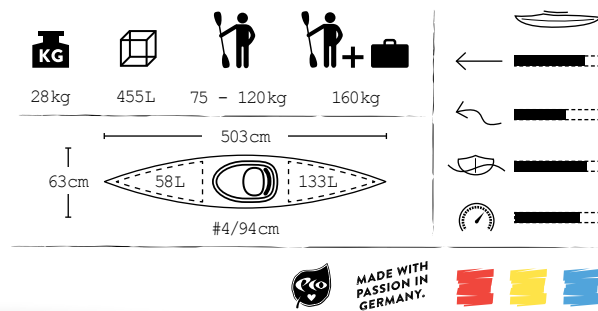

# TOURYAK

The boat for all eventualities! Whether it is a tour on a calm river, a longer round on a big lake or paddling holidays with a lot of luggage, the TOURYAK series is the first choice for all of these. It is large, spacious and safe. The bottom with its dished lateral sides offers a high level of initial and secondary stability, whilst running easily. The established Tour-seat-system allows every paddler to sit in a comfortable position over longer periods of time. Large storage compartments and ample equipment. A true allrounder, made of our almost indestructible HTP.

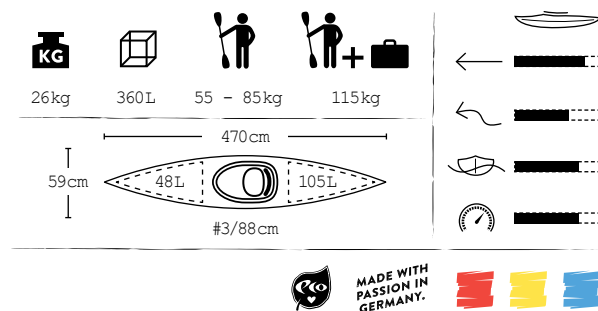

## TOURYAK 500 HTP #100850

Large, spacious and stable. The spacious cockpit allows even taller paddlers to maintain a comfortable seating position over longer periods of time. Large storage compartments and ample equipment enable you to multiday trips, paddling holidays and expeditions.

## TOURYAK 470 LV HTP #100860

The perfect choice for smaller and lighter paddlers until a weight of 85 kg. Deck height, width and volume of this touring kayak are adapted to the needs of smaller paddlers.

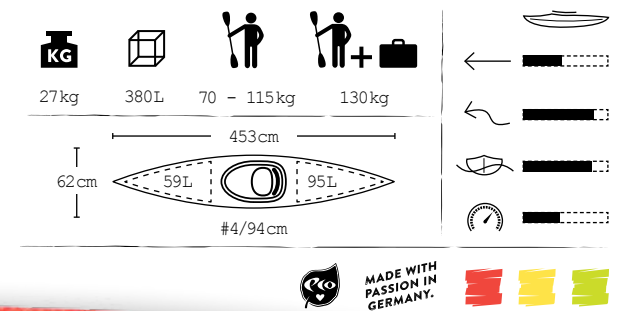

# ENDURO

The adventure starts here! A relaxed tour on the lake, a sporty paddling adventure on a river or action in whitewater - the ENDURO series combines excellent paddling qualities with unbeatable allround skills. Optimized ergonomics are guaranteed by the Tour-seat system and backrest, plus the 3-D-thigh braces. Offering you the best possible comfort and a perfect hold, both on longer distances with luggage and in whitewater. Two waterproof bulkheads, a day hatch and a bungee deck rigging on deck as well as its preparation for steering underline the touring capability. Easy to edge, turn and plough through any water.

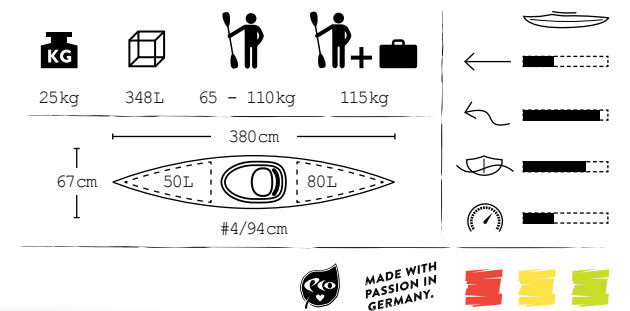

## ENDURO 450 HTP #100550

Agile all-rounder made for lakes, smaller and larger rivers with moving and flowing waters. It focuses on touring, is very maneuverable, turns easily and reacts really fast. It isn't nervous but fast and tracks well for short to longer distance paddling.

## ENDURO 380 HTP #100560

Short and agile - a true allrounder! Its compact measurements combined with the heavy rocker make it even more agile and fast reacting than the 450. Small lakes, rivers and easy whitewater up to class 2 are his terrain. The adventure starts here!

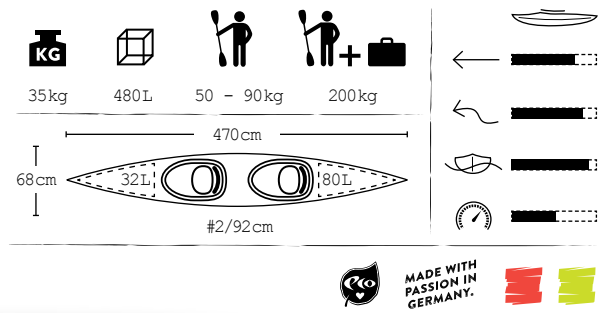

## DAYLINER DUO HTP

#100480

Easy gliding, compact double-seater for calm rivers and day trips. Comfortable and uncomplicated characteristics as well as compact measurements guarantee handiness and low weight. Dayliner-specific equipment offers everything you need for pleasant trips at a favorable price.

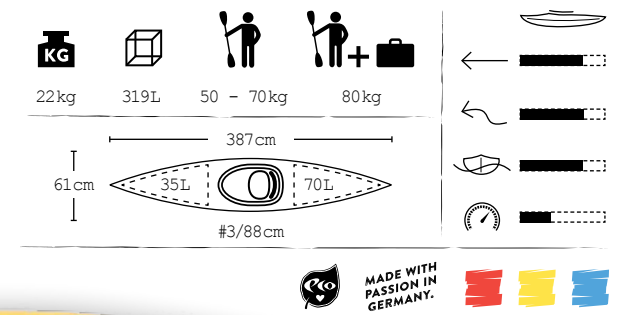

# DAYLINER

Made for beginners and recreational paddlers, looking for uncomplicated paddling fun on daytrips on lakes and rivers. Compact measurements, light weight and an excellent price-performance-ratio are the characteristics of the DAYLINER Series. These kayaks have two watertight separations, a comfortable seating area and can be equipped with a steering. The simple deck equipment saves weight. Pronounced edges on the lower boat provide excellent tracking, the large base in the seating area provides a high level of initial stability and agility.

## DAYLINER S HTP

#10180

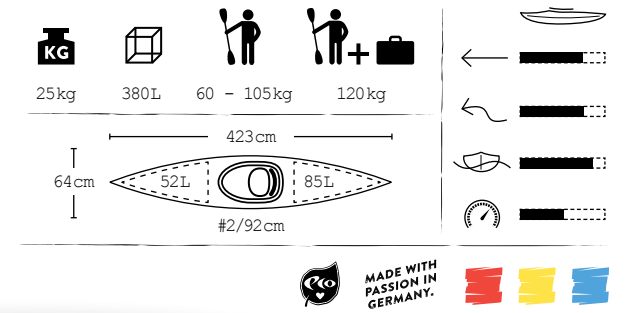

Smaller and lighter paddlers will feel comfortable in this kayak. Its compact measurements and its low weight make it the perfect choice for women and teenagers.

## DAYLINER L HTP

#10190

This kayak is designed for medium to large paddlers. Thanks to its length it's tracking well and can carry paddlers up to 105 kg.

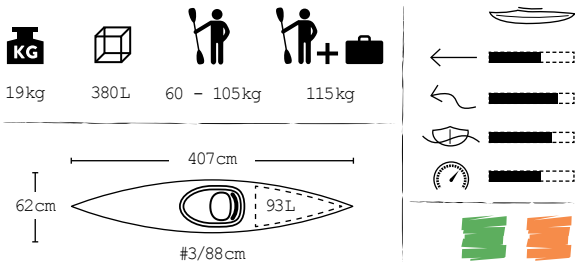

# NARVA & VELLAMO

Lightweight and compact allrounders, made of our established PriLite-material. For calm and slowly flowing waters. They offer you a high initial stability and track well. Thanks to the low weight of the PriLite-material they're easy to handle, e.g. when loading them on and off the car. The NARVA is made for beginners and advanced paddlers, looking for a lightweight and universally – on smaller and larger rivers and lakes - usable kayak. For beginners and recreational paddlers, looking for a compact and light kayak, which is not the fastest and doesn't offer as much volume for gear, but offers a low overall weight and requires only very small space when being stored, the VELLAMO is the right choice.

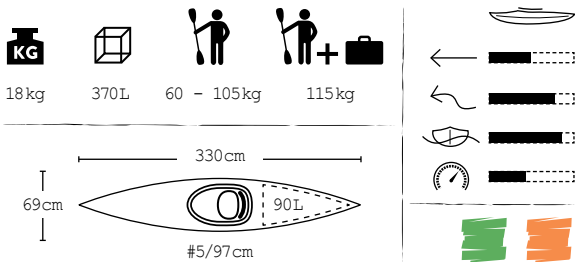

## NARVA PRILITE #20160

A lightweight, universally usable touring kayak made of our established PriLite-material. This guarantees an easy handling, especially during loading on and off the car. Paddles neutral, tracks well and offers you a high initial and secondary stability. The moderate rocker profile makes it agile.

## PRILITE VELLAMO #20165

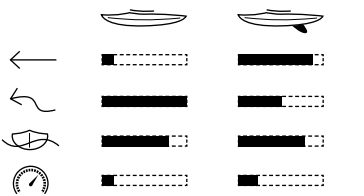

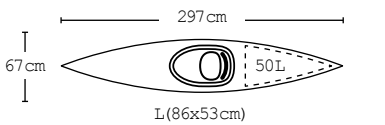

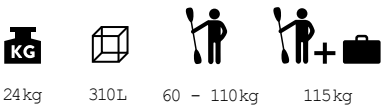

A superlight, compact and stable recreational kayak for relaxed paddling trips on calm waters. The wide basis and the pronounced edges on the bottom make it stable and thanks to the keel it tracks very well. Its large cockpit makes it very easy to get in and out of the boat. Equipped with a comfortable seat, a watertight rear hatch and an adjustable footrest.

## MUNGA HTP #101675

Adventure waits for you! Allround and versatile crossover kayak with skeg! A whitewater-kayak with touring characteristics. Made for a relaxed trip on a lake or whitewater up to class 3. In whitewater, the Munga is very agile, fast and easy to paddle. On calm waters the skeg can be used to make the kayak well-tracking.

It's equipped with a comfortable seat system, consisting of the established tour seat with hip-pads, an adjustable whitewater back belt with ratchets and individually adjustable 3D-thigh braces - which guarantees comfort and optimum contact to the kayak. The aluminum bulkhead footrest offers excellent hold and safety while the waterproof bulkhead in the rear and the day hatch in front offer enough storage for your next adventure.

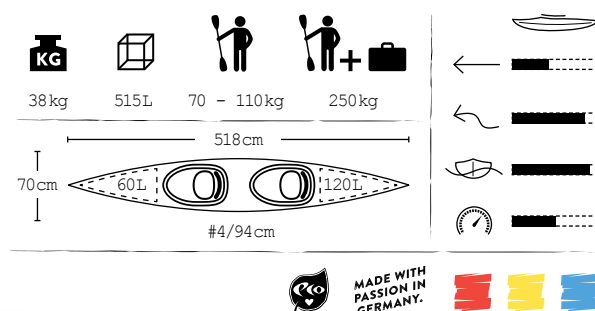

# DOUBLE SEATERS – DOUBLE PLEASURE

Our range of double-seaters consists of kayaks for rivers, lakes and the coast. Five models made of our carefree and everlasting HTP and three models made of lightweight fiberglass or carbon-aramid. All of them are equipped with our comfortable touring seat-system, minimum one bulkhead with waterproof storage and prepared for a ruder.

The model DAYLINER DUO is pictured on page 36, the models CL 470 and CL 520 are on page 43.

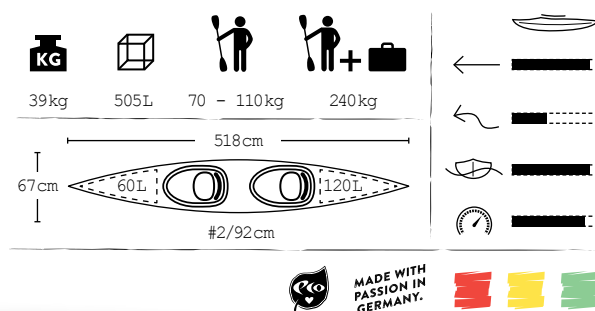

## EXCURSION EVO HTP #10080

A very stable double-seater for your tour on rivers and lakes. The broad chines and a heavy rocker make it agile and glide easily around narrow bends. It has a very stiff hull thanks to our HTP.

## POSEIDON HTP #10170

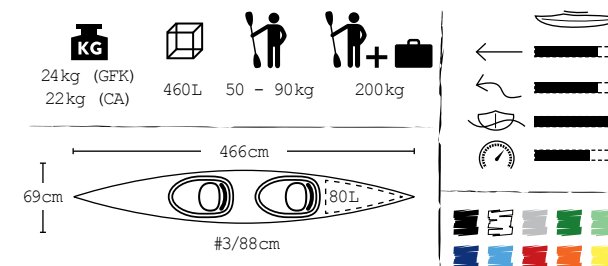

Touring double-seater for open waters and coastal tours with excellent tracking qualities and a pleasant travelling velocity. Equipped with a comfortable seat-system, suitable for longer distances. One of our most stable kayaks.

## PIAVE

GFK: #20892  
CARBON-ARAMID: #20894

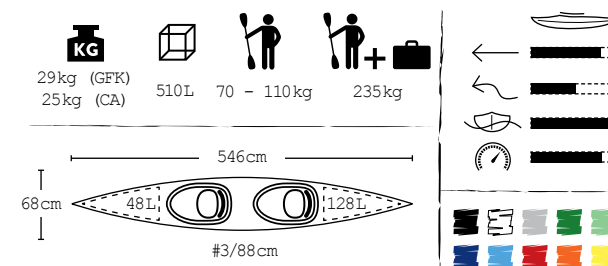

First choice for paddlers, looking for a lightweight and easy to handle double-seater, which can easily be loaded on every car roof. High directional stability as well as agility and flip-stability. Made for lakes and larger rivers.

## YUKON K II SPORT

GFK: #20192  
CARBON-ARAMID: #20194

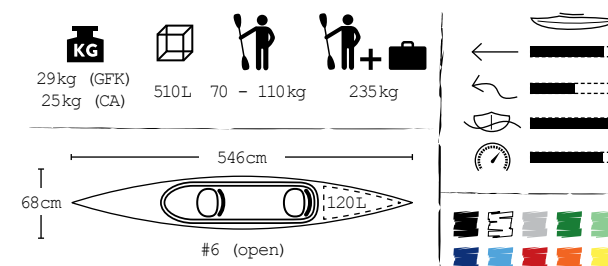

Stable and very fast double-seater, perfect for long tours across open waters. Large, watertight storage compartments and several mounting possibilities on deck offer ample space for your equipment. Very light!

## YUKON K II RELAX

GFK: #20592  
CARBON-ARAMID: #20594

Open version of the Yukon K2 Sport. It's identic in length, width and lower boat. Thanks to the big open cockpit getting in and out of this kayak is made easy! A perfect touring kayak for inland waters with only light swell.

# CUSTOMLINE

Kayaks for beginners and casual paddlers. They are very stable, track well and are easy to maneuver. These boats are very well suited for short tours with little luggage or for kayak rental.

## FULL EQUIPMENT

Adjustable slide-footrest with steering fixtures | Tour-seat with padding | CL-backrest with padding and cover | waterproof bulkhead with cover in the rear | 2-D-thigh braces (not CL 470) | bungee deck rigging

## BASIC EQUIPMENT

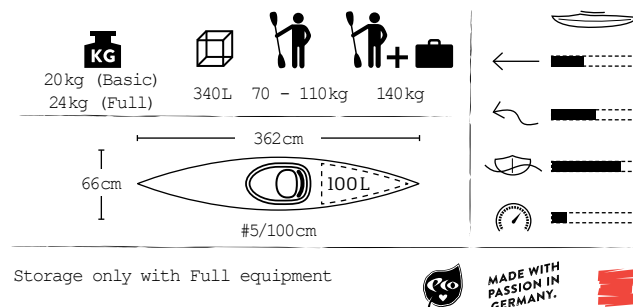

Saw-tooth footrest with 5 fixed notches | Tour-seat with padding | CL-backrest with foam padding and cover | bungee deck rigging

### CUSTOMLINE 370 HTP

**FULL EQUIPMENT: #110030**

**BASIC: #110010**

Good tracking, high level of stability and agility. The large cockpit makes it easier to get in and out of the boat. Our tour seat with the high CustomLine backrest guarantees a comfortable sitting position.

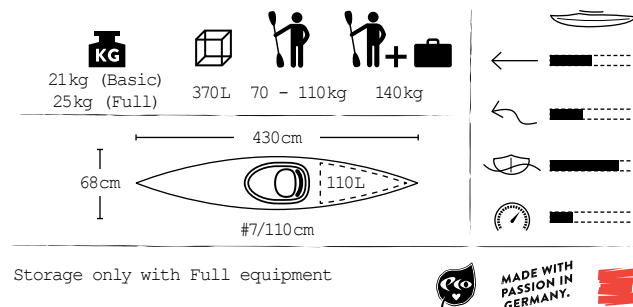

### CUSTOMLINE 430 HTP

**FULL EQUIPMENT: #110330**

**BASIC: #110310**

A very stable beginner kayak with easy handling. Perfect for lakes and calm waters. The extra-large cockpit offers an easy entry and exit. The tour-seat and high CustomLine-backrest guarantee a comfortable sitting position.

### OPTIONAL KIDS-SEAT CL 470

**#90428**

This optional child's seat can be added fast and easy and transforms your CL 470 RELAX into a three-seater family-kayak.

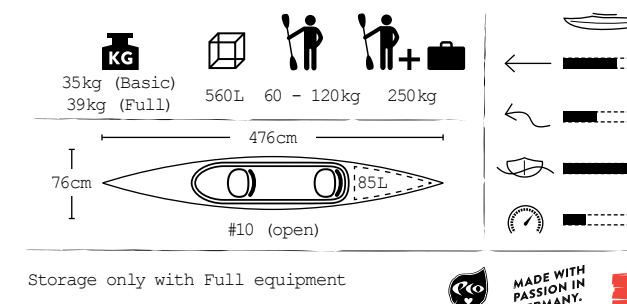

### CUSTOMLINE 470 RELAX HTP

**FULL EQUIPMENT: #110230**

**BASIC: #110210**

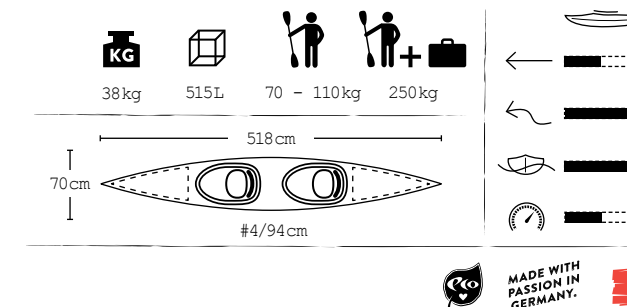

Paddling-fun for the whole family! Comfortable, open double-seater for lakes and calm waters. Offers a very high stability and easy handling. Made for couples, families and rental stations. An optional child's seat can be added quickly and easily.

### CUSTOMLINE 520 EVO HTP

**BASIC: #110310**

Stable and versatile double kayak with basic equipment. For relaxed touring trips on rivers and lakes. Its wide base and the moderate rocker offers you an easy planning around narrow bends. High level of safety thanks to its high total volume. Two large cockpits ensure an easy entry and exit.

# KIDS EQUIPMENT

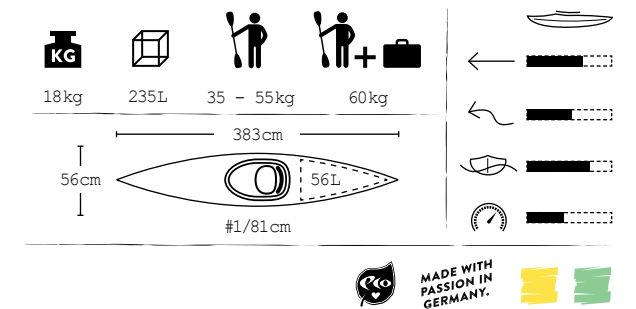

It's time to take the kids out on the water with you! We take a more serious approach on kayaking with children, so that your little ones can go paddling with the family. Basically, kids need the same equipment like adults - especially when they paddle for themselves. A PFD, functional wear, maybe a helmet and of course a kayak, that suits their needs and the planned trip.

With our equipment, especially designed for kids, your offspring can start the next family trip in the best possible equipped way. Because kayaking, exploring domestic rivers and lakes and spending an exciting day at the water with the family is great fun and brings your children playfully to healthy exercise. Nothing stands in the way of the next adventure with our kids equipment

## SEAYAK JUNIOR PRO HTP

#100745

Excellent seakayak for kids! The length and width of the kayak, the size of the cockpit and the ergonomics have been perfectly adapted to suit the needs of children and teenagers. Thanks to its balanced riding qualities, it can keep up well with longer and larger boats, even over longer distances.

## KIDS PADDLE NANO

#356800

#356800TS | PADDLOCK

Lengths Nano: 180 | 185 | 190 | 195cm

Lengths Nano Paddlock: 180 - 190 | 190 - 200 | 200 - 210cm

For the first paddle strokes, a small trip around the lake or a multiday adventure. The children's paddle NANO is a light and functional paddle that is tailored precisely to the needs of adolescents. It's a combination of a thin 27mm fiberglass shaft and small, lightweight injection molded blades. Available also with Paddlock division incl. 10cm of length adjustment.

## KID - BOUYANCY AID

#80040

Front zipper, chest and tummy belt for perfect fit, crotch strap to prevent slipping out, unconscious-safe collar, signal whistle and large reflectors. Normed according to CE.

Sizes: 1 (15 - 20 kg), 2 (20 - 30 kg), 3 (25 - 40 kg)

## NYLON SPRAYDECK SEAYAK JUNIOR

#74105

Colorful spraydeck for kids made of soft and light nylon material, all seams are welded. With a front bag and both adjustable chimney and suspenders. For trips on inland water, to protect your kid from spray and rain.

# PERFECT COMPANIONS

EQUIPMENT AND ACCESSORIES

Our goal? To consistently improve our products, so that you can paddle through life full of passion for discovery, while being unconcerned about your equipment. With clear structures, great materials and well-conceived features. The convenient designs and unique functions make our accessories to your perfect companions – wherever you are.

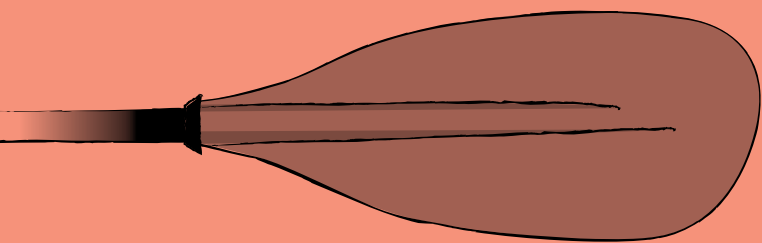

# PADDLE-FINDER

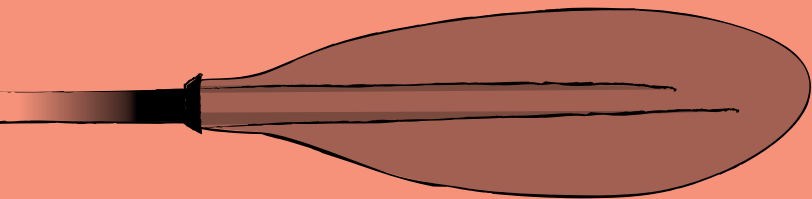

The first step to find the best paddle for you is to define its range of use. Next, narrow down the models according to your paddling style and physique. Based on the width of your kayak and your size you finally choose the correct length of your paddle.

If you're paddling a high angle technique, choose a shorter and wider blade. When you're more into low angle paddling, choose a rather longer and slimmer blade. In general, smaller paddlers pick smaller blades, taller and powerfully built paddlers pick large blades.

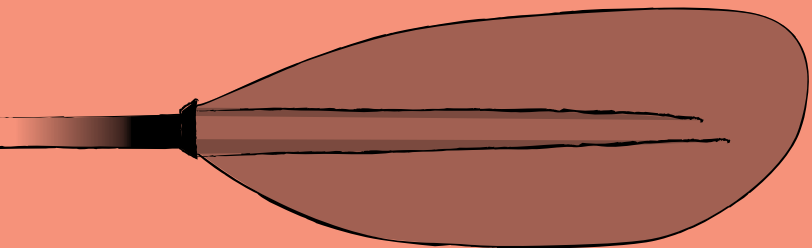

### WIDE AND SHORT FOR STREAMS AND WHITEWATER

Shorter and wider blades, for high angle paddling technique, pulling the paddle close along the boat. Perfectly suitable for all-round kayaks.

### LONG AND SLIM FOR THE SEA AND OPEN WATERS

Longer and slim blades for low angle paddling techniques. Made for sea kayaking and touring on open waters.

### MEDIUM SIZED FOR INLAND LAKES AND LARGER RIVERS

These blades can be used both in high angle and low angle technique and offer good propulsion. Suitable for touring-, all-rounders- and seakayaks.

LENGTH CHART	A	B	C	K	WW	PADDLOCK
The product description of your desired paddle tells you in which lengths it is available. All paddles in fixed length come with a 45° right feather angle as a standard. Left feather angle on demand.	210	180	130	190	190	210
	215	185	140	195	195	220
	220	190	145	197,5	197,5	230
	225	195	150	200	200	240
	230	200	155	202,5	202,5	
	240	205	160	205	205	
		210		207,5	207,5	
				210		

### BENT SHAFT

Some of our Whitewater- and Touring paddles are also available with a wrist-gentle, neutral and superlight carbon bent-shaft.

### PADDLOCK

All of our touring-paddles with 29 mm-shaft are also available with the PaddLock-system. Their length is steplessly adjustable in a range of 10 cm; the feather angle of the blades can be adjusted freely. Small pack size, perfect for transporting.

### FIND YOUR LENGHT

The opposite chart serves as a guideline for touring and seakayak paddles. We recommend a paddle with adjustable PaddLock shaft, to enable you to change the length and angle according to your requirements.

WIDTH OF KAYAK	55 - 59 cm	60 - 67 cm	> 68 cm
BODY LENGTH			
160 - 170 cm	210 - 215 cm	215 - 220 cm	220 - 230 cm
170 - 180 cm	215 - 220 cm	220 - 225 cm	230 - 240 cm
180 - 190 cm	220 - 225 cm	225 - 230 cm	230 - 240 cm
> 190 cm	225 - 230 cm	230 - 240 cm	230 - 240 cm

## HYDRA

Lightweight touring- and seakayak paddle with large sized, stiff blades. For powerful paddlers it offers an optimized power transmission, a variety of different paddle strokes is possible. Works very well with high angle technique. Smaller blade size in the works.

**Blade size: 48 x 20 cm // Lengths: A & PaddLock //**  
**Weight: from 940 g (Glass), from 840 g (Carbon)**

Carbon | #323000  
 Carbon PaddLock | #323000TS  
 Carbon ERGO | #323000E

## RIM ARDECHE

Economically priced allround beginner and rental paddle. Blades made of impact resistant RIM material, shaft made of aluminum. Now also available as adjustable version with Paddlock.

**Blade size: 48 x 19,5 cm // Lengths: A // Weight: from 1100 g**

RIM Ardeche | #314000

RIM-Ardeche PaddLock | #314000TB

## RIM PAZIFIK

Seakayak paddle for beginners and rental stations. Blades made of robust RIM-material, shafte made of aluminum.

**Blade size: 53 x 16 cm // Lengths: A // Weight: from 1100 g**

#315000

## RIM INDIAN

Tough canoeing and rafting paddle. Blade made of impact-resistant RIM material. Aluminum shaft.

**Blade size: 54 x 20 cm //**

**Lengths: C and 165cm with loose grip // Weight: from 890 g**

#352000

## RIM CHIEMSEE

For SUP beginners and rental stations. Pleasant handling thanks to its own buoyancy. Uncut, detachable grip.

**Blade size: 46 x 23 cm // Lengths: 220 // Weight: 990 g**

#351220U

# SPRAYDECKS & COCKPIT COVERS

During paddling, a spraydeck protects your torso and your legs from water dripping down or swashing waves and keeps the inside of the boat dry. The hatch cover protects the inside of the kayak during transport or storage. It further reduces the wind resistance and the road noise and saves fuel during transport. During storage, the inside of the kayak always remains dry and clean, dirt and vermin stay outside. We offer spraydecks and hatch covers in three different materials.

## NEOPRENE

- For continuous operation on rivers, lakes and the sea
- Stays on the cockpit in any case, even in choppy waters or when doing an Eskimo-roll
- Very flexible, will fit on various cockpits

## NEO COCKPIT COVER

Stays super safe on the boat without flattering. Fits different cockpit sizes.

81 – 85 cm | #78210  
88 – 93 cm | #78200

## NYLON

- Basic spraydecks for touring on domestic waterways
- Protects against spray and rain
- Holds well on the boat
- New colors black/orange and black/grey plus some in red

## NYLON COCKPIT COVER

Made of super sturdy PVC-laminated material and available in different hatch sizes.

Sizes, article numbers and prices see adjoining chart >

## FLEX

- Very stretchable
- Superlight
- Small pack size
- Very good hold on the cockpit
- Resilience to wear is a bit lower than the neoprene

## FLEX COCKPIT COVER

Noble optic. Stretches similar to neoprene. Can be stored easily due to its low weight and small pack size.

81 – 88 cm | #78230  
88 – 94 cm | #78235  
95 – 102 cm | #78240

## TOURING SPECIAL NEOPRENE SPRAYDECK

Premium quality touring- and seakayak spraydeck. Very stretchable deck with abrasion-resistant area at the front, knee belt and grip sling. Latex coat on the inside, excellent hold, even on wet cockpit rims. Waist made of breathable 3-layer laminate for a comfortable fit. Waist size can be individually adjusted. Removable shoulder straps.

84 – 88 cm | #73750  
92 – 96 cm | #73700  
95 – 105 cm | #73760  
SEATRON GT | #73770

## TOURING BASIC NEOPRENE SPRAYDECK

For touring paddler, easy whitewater or rental stations. Extremely stretchable deck, two deck sizes, fits cockpits from 86 to 96 cm. Waist made of breathable 3-layer laminate. The very stretchable neoprene band provides a watertight hold on the body.

86 – 92 cm | S/M | #73801  
86 – 92 cm | L/XL | #73802  
90 – 96 cm | S/M | #73803  
90 – 96 cm | L/XL | #73804

## FLEX SPRAYDECK

Superlight, high-quality spraydeck made of stretchy Nylon material with waterproof lamination. Perfect fit due to their neoprene-like stretchability; very light weight and small pack size.

81 – 88 cm | #74500  
88 – 94 cm | #74550  
95 – 102 cm | #74600

## NYLON SPRAYDECK TRAVELLER ORANGE OR GREY WITH REFLECTORS

Robust, universally usable spraydeck for beginners, advanced paddlers and rental stations. Made of sturdy but soft and light Nylon material. All seams are welded. The plate is reinforced with a bracket. Equipped with a mesh pocket with reflective stripes at the front, removable shoulder straps. Waist size adjustable.

### FLOATER

Light touring vest with front zip, round-about-strap to adjust size, reflectors for better visibility and a crotch-strap to prevent the jacket from slipping up. Normed according to CE.

**Sizes:** S | M/L | XL/XXL  
#80070

### MACH 2

Universally usable Touring- and White-water PFD. Equipped with a front zip, an enclosing strap system, hip belt, rescue belt with panic release, various pockets and reflective zones. Cowtail with carabiner. Normed according to CE.

**Sizes:** M/L | XL/XXL  
#80080

### ANGLER

Inconspicuous and superlight vest for fishermen and touring paddlers, with front zip. Three large pockets and adjustable straps at the sides and shoulders. Normed according to CE.

**Sizes:** M/L | XL/XXL  
#80030

### NEOPRENE SHOE LOW

Low-cut paddling bootie made of elastic neoprene with vulcanized sole. Light and flexible, perfect in narrow or competition kayaks.

**Sizes:** 35/36 | 37/38 | 39/40 | 41/42 | 43/44 | 45/46  
#42400

### NEOPRENE SHOE HIGH

High-cut paddling bootie made of elastic neoprene with vulcanized sole. Warms and protects, especially the ankles. Perfectly fits in narrow boats.

**Sizes:** 35/36 | 37/38 | 39/40 | 41/42 | 43/44 | 45/46  
#42300

### SUPERLIGHT CAP

Very thin cap out of 0,5mm superlight-neoprene. Keeps the head warm and fits under the helmet.

**Size:** Uni  
#40710

### PADDLING PAWS

Protect hands from wind and cold. Made of 4 mm - neoprene. Attachment around the paddle shaft with Velcro.

**Size:** Uni  
#40840

### DECK BAG

Made of sturdy Nylon material with welded seams, can be mounted in front or behind the cockpit. Roll-click closure with safety belt, handle and loops for attachment.

#44020

### TOPBOX

Additional and mobile storage for your kayak. Just clip and fix in on your kayak, or take it with you. Equipped with a handle and safety leash with carabiner. Fits on the Pri-Lite Narva, Dayliner S and L and with the optionally available mounting kit on all other HTP-kayak without day hatch.

**TopBox** | #90027

**Optional mounting kit** | #90025

### MAP SLEEVE

Watertight, see-through, with four plastic carabiners for the fixation on the kayak. Two different sizes.

**DIN A4** | #44021

**DIN A3** | #44026

### DECKMASTER

Reflective, watertight deck bag with shoulder straps. Equipped with a net-bag with zip, lateral loops and straps for attachment on your kayak. Reflectors for more safety!

**Orange** | XL | 23L | 690g | with shoulder straps | #44047

**Orange** | M | 13,5L | 680g | with paddlefloat-feature | #44048

**Grey** | XL | 23L | 690g | with shoulder straps | #44027

**Grey** | M | 13,5L | 680g | with paddlefloat-feature | #44028

### CELLPHONE BAG

Floating, waterproof nylon bag with valve for easy inflation, to ensure your mobilephone stays safe while paddling. With safety loop and belt clip.

**XL (Handygröße: 15 × 10 cm)**  
#44029

# BOAT CARTS

For the transport from the car to the water and back, or in the case of it being necessary to walk some considerable distance during a trip on a river. We offer a wide range of boat carts. The choice is made according to the type of the kayak and the required pack size. Smaller, lighter carts can easier be stored in the kayak, larger carts with large wheels run better through rough terrain and do not sink in soft terrain. All of our boat carts are “Made in Germany”.

BOOTSWAGEN	POSITIONIERUNG	BOOTSART	UNTERGRUND	BELADUNG
V-Shape S	Rear	Slim seakayaks	Tar, gravel, grassland	Medium
V-Shape L	Rear	Slim seakayaks	Tar, gravel, grassland	Medium
Steel S	Center	Light to medium weight single kayaks	Tar, gravel, grassland	Low
Steel L	Center	Light to heavy single and double kayaks	Tar, gravel, grassland	Medium
Daytourer S	Rear	Light single kayaks	Tar, gravel, grassland	Medium
Day Tourer L	Rear	Light to heavy single kayaks	Tar, gravel, grassland	Medium
Cart with support	Center	Double-seaters and canoes	Tar, gravel, grassland mud, sand	Heavy
Crossover	Center	Light to heavy single and double kayaks	Tar, gravel, grassland mud, sand	Heavy
Crossover Light	Center	Light to heavy single and double kayaks	Tar, gravel, grassland	Heavy

## BOAT CART WITH SUPPORT

Freestanding cart with voluminous air tires! Excellent ground clearance, cargo straps included. Very strong and stable. Made for the transport of big kayaks, doubles and Canoes.

#90193

Capacity: ca. 110kg | Wheel size:: 25 x 8cm  
Weight: approx. 2,6kg

## V-SHAPE S & L

Designed for slim kayaks with seakayak type keel line and bottom. Thanks to the strong and elastic rubber band, it is mounted on the kayak within seconds. Optimized for the transport from the car to the water or a portage during the trip. The lengthwise rubberized stems keep the kayak safely and without slipping on the cart. Consists of only three parts and us super-easy to dismount.

V-Shape S | #90205

Capacity: ca. 90kg | Wheel size: 19,5 x 4,5cm  
Weight: approx. 1,6kg

V-Shape L | #90213

Capacity: ca. 100kg | Wheel size: 27 x 6cm  
Weight: approx. 2,6kg

## DAYTOURER S & L

Very small packing size! Equipped with a strong and elastic bungee tie-down strap to be attached to the boat within seconds. Perfect for short transport from the car to the water or for short portages! The “L”-version frame is a bit wider, so that it can be mounted a bit further towards the middle of the boat. It also has larger wheels, so that it rolls more easily.

Daytourer S | #90191

Capacity: ca. 90kg | Wheel size: 19,5 x 4,5cm  
Weight: approx. 1,8kg

Daytourer L | #90187

Capacity: ca. 100kg | Wheel size: 27 x 6cm  
Weight: approx. 2,0kg

## CROSSOVER & CROSSOVER LIGHT

Due to its round cushions it's suitable for all boat hulls from seakayaks to canoes. Fully dismountable, with PU foam wheels or broad air wheels. Fits into narrow storage spaces. Cargo straps included.

Crossover | #90186

Capacity: ca. 120kg | Wheel size: 25 x 8cm  
Weight: approx. 3kg

Crossover Light | #90190

Capacity: ca. 120kg | Wheel size: 27 x 6cm  
Weight: approx. 2,7kg

## STEEL S & L

Made of stainless steel and therefore absolutely corrosion-free. The plug-in technology with springs made of stainless steel permits a construction without loose bits and pieces. PU foam wheels have a very light weight, the wheels cannot lose air! Small pack size when dismantled in its five pieces!

Steel S | #90192

Capacity: ca. 55kg | Wheel size: 19,5 x 4,5cm  
Weight: approx. 1,8kg

Steel L | #90197

Capacity: ca. 100kg | Wheel size: 27 x 6cm  
Weight: approx. 2,5kg

# TRANSPORT-SYSTEMS

Our range of transport systems offers you a lot of aid in the transport and handling of your kayak. It starts with the loading on the roof of your car. In any case, you need an officially approved base support bar. These bars are available at specialist retailers. Please consider the legal regulations regarding roof load, lengths, overhangs and labeling requirements when transporting your kayak on the roof of the car. All products of our transport systems range are "Made in Germany".

## TIE-DOWN STRAPS

Made of Polypropylene with self-locking metal buckle. Certified according to EN 12195-2.

3,5m | #90240

5m | #90250

MADE WITH  
PASSION IN  
GERMANY.

## FOAM PADDING

Foam padding for square bars. Smooth transport, prevents the kayak from slipping. Set of 2.

#90236

MADE WITH  
PASSION IN  
GERMANY.

## ADAPTER

Adapter for attaching our square roof rack equipment on bars with groove. Set of 2.

#90226

## TRANSPORT SYSTEMS FOR SQUARE BARS

### 1. ¼-BAR FOR KAYAKS AND CANOES

For the recumbent transport of canoes and large kayaks. Set of 4. Made of galvanized steel.

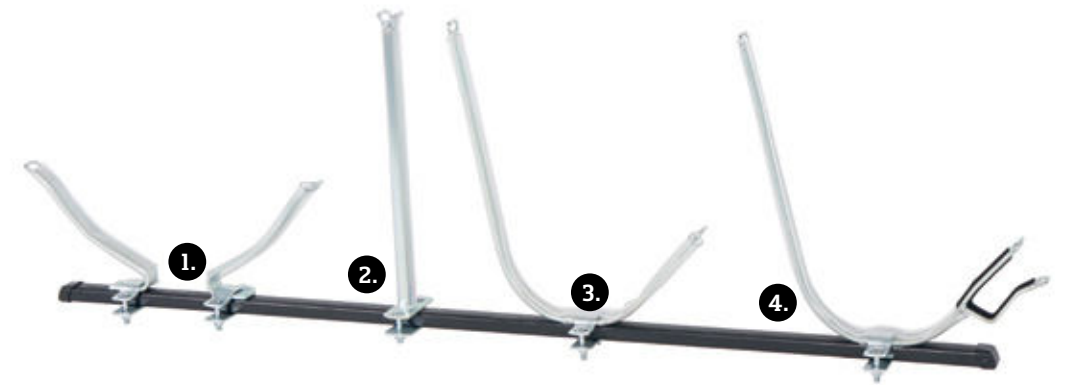

#90221

### 3. J-BAR

To transport a kayak, as the pressure is evenly distributed around the hull. Set of 2. Made of galvanized steel.

#90210

MADE WITH  
PASSION IN  
GERMANY.

### 2. VERTICAL SUPPORT BAR

Perfect solution to transport several kayaks. Belts can be strapped down to both sides. Set of 2. Made of galvanized steel.

#90219

### 4. J-BAR WITH PADDLE HOLDER

For the safe transport of one kayak and 2 paddles. Spreads the pressure around the hull and protects your kayak, paddles do not require an extra strap. Set of 2. Made of galvanized steel.

#90215

## TRANSPORT SYSTEMS FOR BARS WITH GROOVE

### 1. ¼-BAR FOR KAYAKS AND CANOES

Stainless steel. For the recumbent transport of canoes or large kayaks. Set of 4.

#90233

### 2. VERTICAL SUPPORT BAR - RIGID

Galvanized steel. Ideal solution for the transport of several kayaks. Belts can be strapped down on both sides. Set of 2.

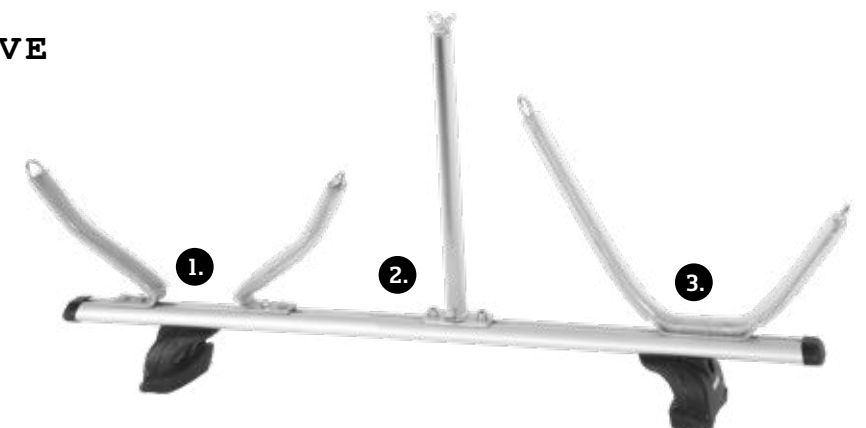

#90223

### 3. J-BAR, GALVANIZED STEEL

Galvanized steel. For the protecting and safe transport of your kayak. Set of 2.

#90224

MADE WITH  
PASSION IN  
GERMANY.

## LOAD ASSIST

Loading your boat made easy! Our load assist makes it possible for one person to load a kayak without any extra help, because you never have to lift the whole weight of the kayak. No difficult balancing to do. Fits nearly every roof rack. By sitting behind the bar it is protected from the airstream while driving. Incl. mountings and instruction manual.

#90264

MADE WITH  
PASSION IN  
GERMANY.

# ACCESSORIES

## STEERING

Fully folding steering for PRIJON kayaks. With a profiled, flow-optimized steering blade, made of fibre-reinforced plastics. Fits all PRIJON kayaks prepared for steering. Tracking and agility can be positively influenced by the use of a steering system.

LUXUS K I | #90524

LUXUS K II | #90517

MADE WITH  
PASSION IN  
GERMANY.

## BILGE PUMP

To remove water from the kayak after capsizing or in case of leakage. An essential when paddling in the sea.

#90139

## PADDLE LEASH

Keeps your paddle safe and connected to the boat. Made of 25mm tubular strap with integrated rubber cord and a Velcro closure for attaching it to the paddle.

#90180

## PADDLEFLOAT

Two products in one! To build a stabilizing outrigger, e.g. for reentering the kayak after flipping. Or as a flat packbag, for watertight transport of equipment.

#80330

## TOWLINE

Rescue equipment for tourers and sea kayakers with a 10 m-rope length and a carabiner. To pull other paddlers or empty boats. Fixed around the torso.

#80178

## POLISH PASTE

For surface care and removal of minor scratches on PriLite kayaks.

#90092

## GLUE

Glue for protecting caps, stern mountings and other waterproofing actions.

#90096

## SEAT PAD WITH LUMBAR SUPPORT

The included lumbar support can be adjusted via the backrest. Made of sturdy Nylon material with included seat foam padding. The backrest is cushioned with a preformed foam wedge. Suitable for many different types of seats.

#90161

## CANOE SEAT

Padded canoe seat for additional installation. Incl. straps for attachment. Upper material 100 % Nylon.

#90162

## SEAT PAD WITH LUMBAR SUPPORT

For upgrading of PRIJON-Tour-Seat Backrest:

#10000041

Seat + Backrest 2 taps:

#10000042

Seat + Backrest 3 taps:

#90002205

## VACO SEAT CUSHION

Seat cushion for PRIJON tour seat with backrest with two notches. Can be adjusted with a vacuum pump to perfectly fit the individual seat shape of the paddler. Sit down -pump - feel comfortable!

#90169

## HIP PADS TOUR-SEAT

Pads to reduce the seat width of the Tour-seat. Fixation with hook and loop fastener.

#10000094

## DISTANCE PARTS FOR 3D-THIGH BRACE

These adapters flatten the seat position. E.g. for smaller paddlers in large kayaks. Comes as a set with matching screws.

#10000095

## REPAIR STICKS

For repairs of minor damages on HTP hulls. Available in different colors.

#90080

MADE WITH  
PASSION IN  
GERMANY.

## BULKHEAD GLUE

To glue foam bulkheads in kayaks.

#10000088

# MATERIALS

## MATERIALS

### HTP - HIGH PERFORMANCE-THERMOPLAST

For the production of our HTP-kayaks, we are using a special Polyethylen – our unique HTP. This material can only be used in blow-moulding and not in roto-moulding production, as used by other producers of kayaks. The molecule chains of HTP are approximately 10 times longer than those of rotated PE. This makes the boat hulls stiffer, lighter and less susceptible to abrasion. HTP-kayaks have clear advantages regarding form stability, abrasion and boat weight, compared to kayaks made of roto-moulded PE. HTP is very environmentally friendly. When it is recycled, there are no poisonous gases or residues; it is ground water neutral and free of heavy metals.

### PRILITE

For PriLite boats, the ABS-combination plates, sealed with UV-resistant Perspex, are pulled into the hot moulds, which have a temperature of approximately 80 degrees, in a computerized process, using heat and vacuum. Top and bottom are inseparably joined together by a double-sided U-profile. This profile additionally strengthens the sides of the kayak against impact. The fitting of deck mountings and interior fittings are done by hand, as on all Prijon boats. Advantages: PriLite boats are approx. 20 % lighter than comparable kayaks made of HTP. At the same time there is a clear advantage regarding stability compared to GRP or Carbon/Aramide.

### CARBON-ARAMID

These boats mainly consist of carbon and aramide fibres, combining the excellent qualities of carbon, which is very hard and gives the boat its stiffness with the qualities of aramide, which is very shock-proof and provides the necessary impact resistance of the kayak. The biggest advantage of this construction method is clearly the incredibly low weight.

### GFK

The fibre mats of our GRP-kayaks mainly consist of fibre glass, which is very stiff, but still reasonably priced. Kayaks made of GRP are comparable to the PriLite boats with regard to their weight and are around 20% lighter than HTP kayaks.

Care:: HTP-boat shells are very sturdy and already possess a permanent protection against UV-rays. Therefore they need no treatment with varnishes, wax or other care materials.

- Extremely high mechanical durability
- Lighter PE-hulls than roto-moulded kayaks
- Not sensitive to ground impact
- Stiff and form-stable during paddle tours in the Arctic and the Tropics
- Recyclable

Repairs/Care: Superficial scratches can be polished off with a special paste, available in specialized shops. Larger repairs are made with Epoxy. The inside of the boat should not be permanently exposed to sun (store upside down!).

- Lighter than HTP
- More sturdy than GRP/Carbon Aramide
- Unique metallic colours

- Lighter than HTP and PriLite (up to 10 kg less than a HTP kayak at the same length)
- Elegant shape
- Stiff hull
- Easy handling outside of the water due to its low weight

- Lighter than HTP and PriLite (approx. 5 kg less than a HTP kayak at the same length)
- Elegant shape
- Stiff hull
- Easy handling outside of the water
